

Digital Logbook

Sprint 1 Wireframes – Mobile

Owner: Frontend Architecture, UI/UX, Responsiveness & Accessibility

Same component notation as the desktop wireframes (Delphi-style tags: Label, Edit, Memo, Button, ComboBox, ListView, Image). The application is still React – these tags only describe element type, not the build technology.

The one structural change from desktop:

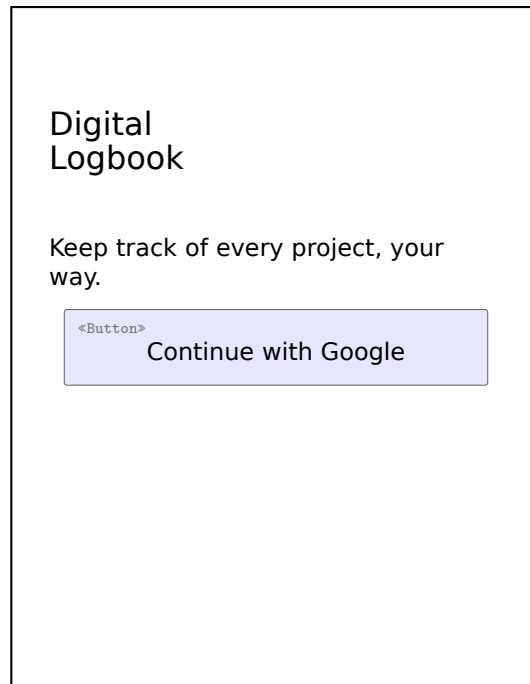

The left sidebar becomes a **bottom navigation bar** – a standard, thumb-reachable mobile pattern. Anything arranged side-by-side on desktop (fields, buttons, stat cards) stacks vertically here instead, since there isn't width to spare.

Low-fidelity wireframes: boxes represent component type and position, not final visual styling.

Contents

1	Login / Register	2
2	Dashboard	3
3	Project List	5
4	Create Project	6
5	Edit Project	7
6	Project Detail	8
7	Entry Capture	10
8	Profile	11

1 Login / Register

Digital
Logbook

Keep track of every project, your
way.

«Button»
Continue with Google

The image shows a mobile app screen for 'Digital Logbook'. It features a title, a descriptive sentence, and a single full-width button for Google login.

What changed from desktop: nothing structural – one Button, full width instead of a fixed narrower width, same as desktop otherwise. No nav bar, since this screen is pre-login.

2 Dashboard

Dashboard – empty state

Welcome back,
[name]

No projects yet.
Create your first project to start logging your work.

«Button»

+ New Project

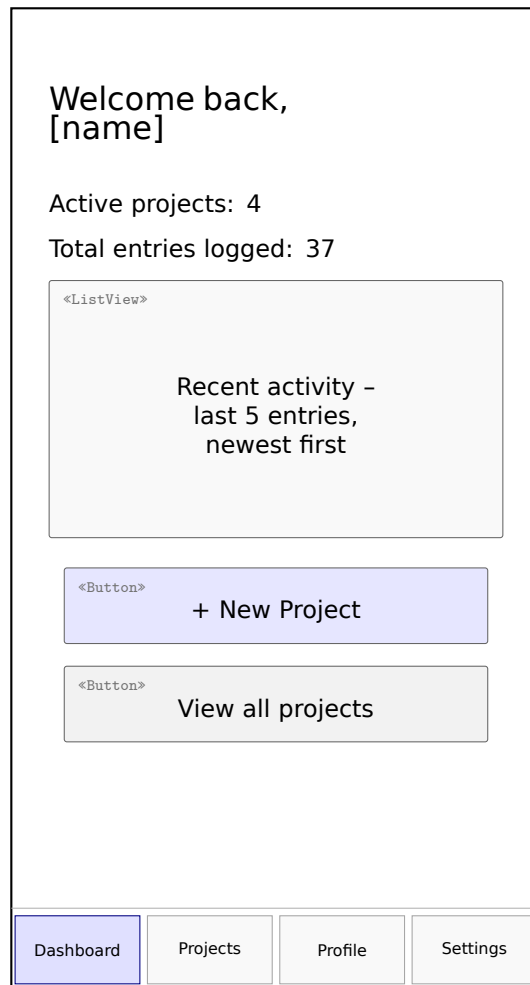

Dashboard

Projects

Profile

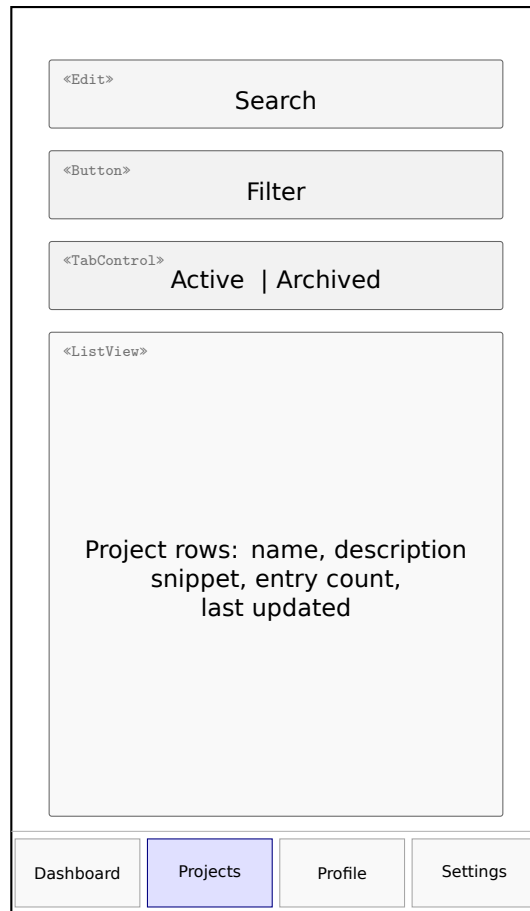

Settings

Dashboard – populated state

What changed from desktop: the two stat Labels stack instead of sitting side by side. “+ New Project” and “View all projects” stack as full-width Buttons instead of sitting next to the ListView.

3 Project List

What changed from desktop: Search and Filter no longer share a row – each is full width, stacked, since a Filter Button squeezed next to a Search Edit would be too narrow to tap reliably.

4 Create Project

Step 1 of 2 – project details

A form for project details. It contains two input fields: 'Project name' with an '«Edit»' icon and 'Description (optional)' with a '«Memo»' icon. At the bottom, there are two buttons: 'Cancel' (light gray) and 'Next' (light blue).

Step 2 of 2 – define entry fields

A form for defining entry fields. It starts with the text 'This project's entries will have these fields:'. Below this, there are two identical rows for defining fields. Each row consists of an '«Edit»' icon, a 'Field name' input field, a '«ComboBox»' icon, a 'Text / Number / Date-time' input field, and a '«Button» Remove' button. At the bottom of the field definition section is a '+ Add field' button. At the very bottom of the form are two buttons: '«Button» Back' (light gray) and '«Button» Create' (light blue).

What changed from desktop: each field row's name/type/remove group stays roughly intact (still needs to read as one row), but the row itself now spans full width rather than sharing space with a wider form.

5 Edit Project

«Edit»
Project name

«Memo»
Description

«Edit»
Field name

«Button»
Remove

«ComboBox»
Type

«Button»
+ Add field

«Button»
Cancel

«Button»
Save

Single popup, same as desktop – still one screen, not split into steps.

6 Project Detail

Project Detail – empty, no entries yet

[Project name]

«Button»
Edit

«Button»
Archive

[Description text]

No entries yet – add
your first one below.

«Button»
+ Add Entry

Dashboard

Projects

Profile

Settings

Project Detail – with entries

[Project name]

«Button»
Edit

«Button»
Archive

[Description text]

«Button»
+ Add Entry

«ListView»

Entry rows: field values,
newest first

Dashboard

Projects

Profile

Settings

What changed from desktop: Edit and Archive Buttons stay side by side (still comfortably tappable at half width each), everything below stacks full width.

7 Entry Capture

Log an entry for:
[project name]

«Edit»Field 1

«Edit»Field 2

...one input per defined field

«Button»
Cancel

«Button»
Save

8 Profile

The image shows a mobile profile form layout. At the top is an 'Avatar' field with a placeholder image icon. Below it is a 'Bio' field with an 'Edit' icon. This is followed by a 'Joined: [date] (read-only)' label. Then come 'Name' and 'Username' fields, each with an 'Edit' icon. At the bottom of the form are 'Cancel' and 'Save' buttons. A navigation bar at the very bottom contains 'Dashboard', 'Projects', 'Profile' (the active page), and 'Settings'.

What changed from desktop: avatar centers above the form instead of sitting beside it; Name and Username stack instead of sharing a row.
